11/1/2013	NOT ACCEPT	<p>██████ died on 10/10/2013, but it's medically unable to be determined whether or not the condition that she expired from was the result of any abuse or neglect. ██████ and her twin sibling ██████ were born prematurely, at 25 weeks of gestation. ██████ was on a ventilator afterwards and had bleeding of the brain, in the form of interventricular hemorrhages that would have caused retardation and cerebral palsy. The parents removed life support from ██████ on 10/10/2013. The mother tested positive for drugs on three separate occasions within ten days prior to the twins' births, but the children tested negative at birth. The first positive test result was for cocaine, opiates, and methadone, while the other two tests showed only the latter two drugs. The mother claims that she has not used cocaine since she was in her twenties, and that the cocaine result was a false positive. The children did not exhibit any known withdrawal symptoms after delivery. The mother gave birth prematurely because of a placental abruption. It could not be medically determined if the premature delivery or ██████ disabilities were due to the mother's drug use or not. The mother has a history of previous drug use.
