Risk Pool Funding Application

Please complete all items and submit electronically to the Regional Managing Director. Upon review and concurrence of the Risk Pool Request, the Regional Managing Director will submit the application and all supporting documentation to the Assistant Secretary for Child Welfare and copy the Deputy Secretary for the Department, Assistant Secretary for Operations, the Lead Agency Chief Executive Officer/Executive Director, Regional Family and Community Services Director, Department CBC Contract Manager and the Florida Coalition for Children Fiscal Committee. No hard copies, please.

Lead Agency Name: ChildNet, Inc. - Palm Beach

Region Southeast

Address: 4100 Okeechobee Blvd.

Contract # IJ706

West Palm Beach, FL 33409

Lead Agency Contact: Emilio Benitez

Phone# 954-414-6000

Contract Manager: Ralph Silverstein

Phone# 954-818-5773

Section I - Reason for Risk Pool Funding Request

Please provide a detailed description of the reasons(s) for this request under the appropriate criterion below (Items 1-5).

- 1) Significant changes in the number or composition of clients eligible to receive services. Describe in detail the previous year through current fiscal year-to-date's service trend data.**

During the two prior fiscal years Circuit 15 experienced unprecedented increases in the number of children removed from their homes due to abuse, abandonment, and neglect. During those past two fiscal years (FY2013/14 and FY2014/15) the mean number of Palm Beach children removed annually increased to more than 1,000, a 55% increase compared to the annual average of just over 660 during the three preceding years ([FY 2010/11, FY 2011/12 and FY 2012/13](#)).¹ These increases placed tremendous financial strain on ChildNet, the local CBC lead agency, which was able to withstand substantial operating deficits only with generous additional allocations by the Department of Children and Families, first via a Legislative Budget Commission request and more recently with "back of the bill" funding. During the current 2015/16 fiscal year there have been some positive changes. Both the total removals and the total number of dependent children in the circuit have, for now, at least stopped increasing. They have, however, stabilized at levels still substantially higher than they were when ChildNet initially assumed local lead agency responsibilities during the 2012/13 fiscal year. For example, the average number of Circuit 15 children in care thus far this fiscal year as of January 10, 2016 is 1,679, nearly identical to the 1670 it was for the 2013/14 fiscal year but 299 children and 22% [more than in 2012/13](#).²

¹ See Risk Pool Calculations - Removals

² See Risk Pool Calculations – Average Children in Care

Unquestionably, the elevated, albeit stable, number of local children in care continues to contribute to the substantial financial pressures ChildNet still experiences in Palm Beach. Perhaps more important this year, however, is the composition and, in particular, the placement of these children. What is most concerning is that though the total number of children in care has stabilized, the number of children in out-of-home care has continued to rise and, crucially, the continuing growth in out-of-home care is nearly exclusively in licensed and, therefore, more expensive care. During the current fiscal year, as of January 10, 2106, the average number of Circuit 15 children in out-of-home care is 1,195, 34 more than last year, 114 more than the year before that and 288 more than in FY 2012/13. Even more importantly, again, these increases are nearly totally in licensed care. The average number of children in residential group care thus far this year is 234, 27 more than last year, 30 more than the year before that and 44 more than in 2012/13. Moreover, the increase in residential group care is not related to a failure to utilize foster homes. The increases there are equally substantial and consistent. The average number of Palm Beach children in foster homes thus far this year is 319, 17 more than last year, 54 more than the year before that and 86 more than in 2012/13. In stark contrast to these licensed care increases, the average number of children placed with appropriate relative/non-relative caregivers so far this year, 574, is actually a decrease of 12 compared to last year and only 3 more than the [year before that](#).³

An equally potent indicator of the current shift in composition of clients is the change in the percentages. For example, during the current fiscal year a staggering 71% of Circuit 15 dependent children are in out-of-home care compared to 66%, 65% and 66% in the three prior fiscal years respectively and despite this overall increase in out-home placements, the percentage of relative/non relative caregiver placements within them has actually declined this year to 48% of all out-home-placements from 51% and 53% in the [two prior years](#).⁴

Analysis of the initial handling of Circuit 15 dependency cases offers additional and dramatic evidence of recent changes in client composition. It may also offer a possible explanation for some of them, as it describes changes that appear to coincide with the implementation of the Safety Decision Making Methodology in the Circuit. Analysis of new direct file cases shows steady and substantial declines over the last two and a half years, from a total of 219 cases and an average of 18 per month in FY 2013/14 to a total of 82 and an average of 7 per month in FY 2014/15, finally falling to a total of 12 or only 2 per month during the first half of the current 2015/16 fiscal year. The possibility of a link between the decline in Circuit 15 direct files and the Methodology is most strongly suggested when these cases are analyzed by calendar year. The full local implementation of the Methodology by Child Protective Investigators began in January 2015. During the prior 2014 calendar year the total number of initial direct files had been 160 with a monthly mean of 13. During the subsequent 2015 calendar year that plummeted to a total of only 27 and a [monthly mean of just 2](#).⁵ This precipitous drop coincident with the full implementation of the Methodology is equally striking when looking at the number of children involved in initial direct file cases since October 2014. It reveals a particularly precipitous drop beginning with the full local implementation of the Model by Circuit 15 Child Protective Investigators in January, 2015. During the final four months of the 2014 calendar year the mean number of Circuit 15 children involved in new direct file cases monthly and thus initially remaining in-home under protective supervision with judicial oversight was 30. In the 12 months since then, that has plunged to a monthly average of only 4 children initially remaining in-home under protective supervision. There has during that time, admittedly, also been an increase in the number of in-home non-judicial cases that is also likely associated with full implementation of the Methodology. However, even when the non-judicial cases are included, this analysis still reveals a dramatic drop in the monthly mean number of children in *all* new in-home cases from 42 per month during the final quarter of 2014 to just 20 per month during the entire [2015 calendar year](#).⁶

³ See Risk Pool Calculations – Average Children in Care

⁴ See Risk Pool Calculations – Average Children in Care

⁵ See Risk Pool Calculation – New Direct Files and New Referrals for In-Home Services

⁶ See Risk Pool Calculation – New Direct Files

In summary, the challenges necessitating the current request are multiple. First while the number of children in care in Circuit 15 has stabilized it has done so at numbers similar to those that have previously required ChildNet to seek and receive additional resources in order to continue effective service to local dependent children. Moreover, though the overall number of children in care has stabilized, the number of children in out-of-home care continues to rise and these increases are exclusively in more expensive licensed care. What is more, the trend is unlikely to cease. Rather, in the absence of a modification of the handling of cases at the front end, one could very logically assume that the disparity will continue to grow as in-home cases continue to close faster than out-of-home and then fail to be “replaced” by new in-home cases. The prospect of the Palm Beach child welfare population becoming more and nearly entirely out of home is certainly not unrealistic.

2) Significant changes in the services that are eligible for reimbursement.

Not Applicable

3) Significant changes in the mix of available funds.

Not Applicable

4) Continuity of care in the event of lead agency failure, discontinuance of services, or financial misconduct.

While not a part of this application, ChildNet has created a transition plan in the event of the above circumstances.

5) Other reason(s) not included in Items 1-4.

Not Applicable

Section II - Details of the Relevant and Verifiable Service Trends and Changes that have Occurred Upon which this Request is Based

1) From the statements in Section I, reiterate what the problem definition is and the reason for applying to the shared risk pool.

Dramatic increases in removal rates and associated increases in the number of dependent Palm Beach children first impacted ChildNet's finances significantly in fiscal year 2013/2014 when expenditures for fiscal year 2013/2014 exceeded the annualized totals for the previous fiscal year by more than \$5 million. ChildNet utilized its entire available carryforward balance of just over \$500 thousand attempting to meet these increased 2013/2014 expenditures and then relied on a one-time appropriation recommended by the Secretary of the Department of Children and Families and approved by Florida's Legislative Budget Commission (LBC) to ameliorate its remaining and substantial deficit. However, as a result of the continued escalation of children entering the system, expenditures for fiscal year 2014/2015 proceeded to exceed the 2013/2014 level by more [than \\$1.3 million.](#)⁷ ChildNet relied on the balance of the LBC appropriation plus a recommended one-time allocation from DCF of \$1.8 million "back of the bill" funding authorized by Section 43 of the 2016 General Appropriations Act to address the shortfall for last fiscal year.

The dramatic shift in client and case composition cited above, the continuing increase in the number of Palm Beach children placed in out-home-care, makes a repeat of these prior years' deficits unavoidable. For the current 2015/2016 fiscal year the increased number of children entering out of home care continues to again place a significant strain on ChildNet's resources. Invoiced expenditures for the first five months have already exceeded \$20.7 million, which is approximately 48% of the [DCF funding allocation.](#)⁸ Annualized expenditures for the current fiscal year are now projected to exceed the overall allocation by approximately \$5.9 million by the end of [this fiscal year.](#)⁹

2) State how and why the underlying circumstances that resulted in this need are beyond the control of Lead Agency management. Justify the determination that the current operating shortfall cannot be reasonably expected to be effectively managed by the lead agency.

As stated above, the primary driver for the increased costs and subsequent budget deficits has been the shift in client and case composition involving substantially more children placed in out-of-home care, especially more costly licensed care. Certainly, one way of responding to this is to work harder and more effectively at the timely and stable reunification of children. ChildNet and its Circuit 15 partners have certainly done this. If not, the current financial pressures would be even more severe. ChildNet and Circuit 15 have continuously exceeded performance targets on three of the four permanency measures of the CBC Lead Agency Scorecard (Percent of children exiting foster care to a permanent home within 12 months of entering care, Percent of children achieving permanency in 12 months for children in foster care 12 to 23 months and Children's placement moves per [1,000 days in foster care](#))¹⁰ and has had consistent improvement on the fourth measure (Percent of children who do not re-enter foster care within 12 months of moving to a permanent home), finally also meeting the target on that measure in our last weekly internal review [on January 7, 2016.](#)¹¹

Another CBC response should be, and has been, increasing the inventory and utilization of less costly foster homes. ChildNet has consistently been a leader in the state in the creation of new foster

⁷ See CBC Final Expenditure Report Comparison

⁹ See 2015/16 Expenditure Projection

¹⁰ See CBC Lead Agency Scorecards

¹¹ See CN PB Internal Scorecard

homes. The organization and its subcontracted child placing agencies have increased the licensed foster home capacity in Palm Beach by 41%, a net gain of 85 homes, over a two and a [half year period](#).¹² Unfortunately, the increase in the number of out-of-home cases and placements has literally outpaced the increased capacity and prevented this strategy from reaping its usual and expected benefit of reducing shelter and group care costs, which have instead increased by more than \$2 million (24.5%) over the [two year period](#).¹³ Even worse, based on the current trend, those costs are projected to increase by approximately an additional \$3.8 million for the [2015/16 fiscal year](#).¹⁴

Finally, a lead agency should respond by controlling and limiting its administrative costs and ChildNet has certainly done that in Palm Beach. ChildNet has consistently maintained one of the lowest administrative cost percentages among the Florida's CBC lead agencies, routinely placing among the statewide leaders when this was a Scorecard measure. The agency's economic efficiencies in Palm Beach are also highlighted by its eradication of an acknowledged deficit in excess of \$1 million inherited from its predecessor as the Circuit's CBC lead agency and its actually generating a carry forward when the number of children served was the same as what had driven its predecessor deeply into the red. Finally, ChildNet has become even leaner in the past two years, reducing its local administrative support staff by 15 percent.

There are, however, important and very significant contributors to the current fiscal challenge that are beyond the control of this lead agency, and they seem to be contributing mightily. First and foremost is the initial decision to remove and place a child in out-of-home care. Clearly things have changed dramatically in Circuit 15 in this respect, first with the increased attention of the Miami Herald to the deaths of children in families known to the Department of Children and Families and more recently with the full local implementation of the Safety Decision Making Methodology. It is absolutely essential that we recognize that the changes in performance by local child protective investigators are inherently and predominantly positive. They are making good decisions about child safety and giving increased and improved attention to family challenges. Virtually every local child welfare stakeholder seems to both concur with this and suggest that for several years the number of removals and the number of Palm Beach children in care were significantly lower than they had been historically and, in many stakeholders' opinions, lower than they should have been. So the number of children in foster care in Palm Beach today is very likely what it should be but we desperately need increased and sufficient financial resources to handle that number.

The second factor largely out of the lead agency's control is the initial placement of children with appropriate relative and non-relative caregivers, historically and still primarily the responsibility of the protective investigators. Obviously increased placement with and utilization of kinship care could benefit local children and go a long way toward containing the circuit's increased and increasing out of home care costs. Regrettably, neither ChildNet nor the Department of Children and Families realized until fairly recently that local performance here was actually lagging far behind the rest of the state. At the present moment, January 10, 2016, Circuit 15 actually has Florida's lowest percentage of its dependent children placed with appropriate relative or non-relative caregivers. The current 49% lags well behind the state's leaders who are currently at 64% and the statewide [average of 57%](#).¹⁵ Looking more closely at the actual initial placements, we again see evidence that conforms to the out home care trends described above. Initial placements with relative/non relative caregivers in the Circuit have been dramatically on the decline during the current and prior fiscal year. In FY 2013/14 they actually comprised 63% of all intakes but that dropped to 59% in FY 2014/15 and is now at 40% through the first half of the current [2015/16 fiscal](#).¹⁶ All of this said, once aware of the challenge, the local Department of Children and Families response was immediate and strong. A goal of 65% initial

¹⁴ See Three Year Expense Comparison

¹⁵ See In and Out of Home Care Report Summary 1/10/16

¹⁶ See Risk Pool Calculations – Relative / Non Relative Placements

placement with relatives/non-relatives was established and the movement toward that goal is being carefully monitored and strongly motivated by the highest level of local Department of Children and Families administration. Regrettably, like most improvements in child welfare, it is taking some time for this one to gain consistent traction. Thus far this fiscal year, while there has been one outstanding month, November, in which the percentage increased to a staggering 73%, in no other month has the goal yet been surpassed. Significant improvement here would undoubtedly go a long way toward halting the continued increased in licensed placements and the accompanying continued increases in out-of-home care costs and we are hopeful, and confident, that it will happen. It just really has not thus far.

3) Describe and discuss the data-driven analysis to support this request. Include all relevant sources of data with the sources, dates and time periods covered by the data clearly identified. (Send/attach electronic version whenever possible.) Incomplete data analysis will delay the application review process.

Documents are listed in the order they appear in the document and are included in the attachments.

- A. [Total removals comparisons](#): Fiscal years 2010/11, 2011/12, 2012/13, 2013/14, 2014/15, and 2015/16. Data from the DCF Child Welfare Services Trend Report.

- E. [Trends in initial relative/non-relative](#) caregiver placement. Data for the 2015/16 fiscal year from Southeast Region Circuit 15 Critical Data Report FY 2015/16, 2014/15, and 2013/14.

4) When and how was the problem initially identified and communicated to the Regional Managing Director? (Attach documentation)

ChildNet first identified a concerning trend in Circuits 15 and 17 during the first half of the 2013/14 fiscal year. An initial communication and request for DCF assistance was forwarded to the Regional Managing Director in January 2014 that specifically addressed Palm Beach, the area that then required more [immediate attention](#).¹⁷ Late in the fourth quarter of the 2013/14 fiscal year and early in the first quarter of the 2014/15 fiscal year, ChildNet continued expressing its concerns on various levels regarding the escalating financial issues in both Broward and Palm Beach, including joining the Regional Managing Director in describing the challenges directly to the Assistant Secretary for Child Welfare. ChildNet formally notified the Regional Managing Director of the anticipated shortfall and need for relief via Risk Pool funding for the current fiscal year in a letter dated [June 30, 2015](#).¹⁸ ChildNet continues to regularly update the Regional Managing Director on the issue, providing census and fiscal reports at monthly meetings of its Palm Beach Advisory Board that describe in detail the increased number of children in out-of-home care and their fiscal impact.

¹⁷ See Review Request Letter

¹⁸ See Funding Request Letter

5) What steps were taken to address the problem at the local level? (Attach documentation as appropriate. Quantify any level or percentage of risk that has been effectively managed or absorbed by the Lead Agency.)

ChildNet in Palm Beach has already taken multiple aggressive actions to reduce its costs without endangering the safety of the children in its care. These have included, starting with the beginning of the 2014/2015 fiscal year, agency wide salary decreases for all staff ranging from 1 to 3% percent annually, the elimination of approximately 15% of its administrative and budgeted support positions and reductions in reimbursement rates of between 4 and 8% for nearly all of its subcontracted service providers, the singular exception being its subcontracts for foster home recruitment.

ChildNet has also aggressively sought additional funding to support new programming that might directly or indirectly reduce its out of home care costs. A grant from Casey Family Programs will support a staff member dedicated to regularly convening Permanency Roundtables, intensive structured reviews of the cases of children in care for extended periods of time, and then monitoring and managing the resultant recommendations for the timely movement of the target child to permanence. A grant from the Quantum Foundation will support additional specialized staff whose goal is to sufficiently increase the recruitment and support of medical foster homes to enable ChildNet to double the local inventory of medical foster homes and decrease reliance on more costly special medical facilities and Agency for Persons with Disabilities (APD) licensed group homes. A successful application to Leadership Palm Beach has just begun to support development of a marketing campaign and materials targeting increased and enhanced countywide foster home recruitment, an initiative that both the local Community Alliance and the Superintendent of the Palm Beach County School District have endorsed as priorities. Recruitment efforts should also be substantially boosted by a new Churches United for Foster Care campaign led jointly by Place of Hope and 4KIDS of Florida scheduled to launch at the end of January 2016. ChildNet is also currently in negotiations with two child placing agencies who have had success elsewhere in the state and is confident that they will be expanding their foster home recruitment and management operations to include Palm Beach during the second half of this fiscal year.

ChildNet is also hopeful that the recent introduction of two new programs, one funded by ChildNet and one by the Southeast Florida Behavioral Health Network (SEFBHN), will reduce the number of local children in out of home care by providing intensive interventions with families either to prevent removals or by facilitating more timely reunifications. ChildNet is subcontracting with Camelot Community Care to provide Functional Family Therapy (FFT) to intensively work with and support children and families to prevent "lockouts" related to a child's delinquent behavior or mental health challenges and/or the potential dissolutions of kinship care and adoptive placements leading to entry into or returns to out of home care. SEFBHN is subcontracting with Henderson Behavioral Health to operate Family Intensive Treatment (FIT) teams that provide treatment and supports to families beset by substance abuse sufficient to either prevent the removal of their children or to facilitate their more timely reunification.

It is important to recognize, however, that none of the new programming described above is guaranteed success. Nor will any of it likely have an immediate impact on the current problem. Rather, they will likely not begin to bear fruit until the later part of the current fiscal year or, more likely, the next fiscal year. Moreover, their impact may ultimately be somewhat limited by the fact that they are largely going to address and attempt to enhance areas of performance, foster home recruitment and timely permanence, where ChildNet Palm Beach and Circuit 15 are already among the state's top performers.

6) What is the anticipated outcome if the problem is not remedied?

In fiscal year 2012/2013, when serving an average of 1,380 children, 907 of them in out-of-home and 423 of those in licensed care and receiving an annual core allocation of \$28.7 million ChildNet was able in nine months to erase an inherited local CBC lead agency deficit in excess of \$1 million and generate a carry forward of approximately \$500,000. During the subsequent two fiscal years when it had to serve an average of 1,670 and 1,761 total children, 1,081 and 1,161 in out of home care and 469 and 508 in licensed care with annual core allocations of \$29.2 million and \$30.3 million ChildNet developed annual shortfalls of \$3.1 and \$3.8 million dollars. Today with an average of 1,679 total children, 1,195 of them in out-of-home care and 553 of those in licensed care and a current core allocation of \$31.8 million¹⁹ the situation essentially remains unchanged and ChildNet is projecting a shortfall of \$5.9 million.²⁰ Most simply put, the incremental increase in annual core funding totaling 10% over this period simply has not been nearly sufficient to support the overall increases of 22% in total children served, 32% in those served out-of-home and 31% in those served in licensed care.²¹

In the past, the shortfalls severely impacted the agency's cash flow and threatened its continued operations. Only the remarkable partnership between ChildNet, the Department of Children and Families, the Florida Coalition for Children, the Florida Legislature and ultimately the Governor which resulted in allocations to ChildNet Palm Beach of \$5.1 million through a Legislative Budget Commission request and \$1.8 million through last year's "back of the bill" appropriation have enabled ChildNet to weather the past financial crises and continue to effectively serve the abused, abandoned and neglected children of Palm Beach County. The work of those very same partners also led to the current Risk Pool funding appropriation designed to assist those lead agencies and those communities that continue to or newly face these very same challenges. ChildNet hopes that it will similarly benefit from that appropriation this year as it has from the others in the past while these same partners work during the current legislative session to establish increased levels of recurring annual funding for CBCs that will match the increased numbers of children and families that they now are serving. If not, ChildNet envisions reaching a point prior to the conclusion of the current fiscal year when it will be unable to meet its financial obligations to its staff, its network of service providers and ultimately, and most importantly, fail in its mission to protect our community's abused, abandoned and neglected children.

7) Provide any additional information that is relevant to applying for Risk Pool funding, such as recent fiscal monitoring reports and audit, records from meetings of Board of Directors, etc.

Not Applicable

Section III – Confirmation of Budget Request

- 1) Confirm the dollar amount being requested: \$5,927,407
- 2) Confirm that funds will be expended by the end of the current fiscal year: ☒ Yes ☐ No
- 3) How do you propose to use these funds to address or correct the underlying cause of the shortfall?

As has been stated above, the primary driver for the increased costs and subsequent budget deficits has been the shift in client and case composition involving substantially more children placed in out-of-home care, especially more costly licensed care. ChildNet will continue to aggressively seek or develop new programming that may have a direct or indirect impact on the increased out of home care costs.

The funding from the risk pool will ameliorate the current financial crisis but there needs to be long term recurring revenue that is commensurate with the increased level of children entering the child welfare system.

Florida Department of Children and Families
111 South Sapodilla Avenue, Room 301-E
West Palm Beach, FL 33401

RE: Review Request

Dear Ms. Tilford:

In accordance with Attachment 1, section B.1.I, ChildNet, Inc. is requesting that a review of the contract utilization levels in Circuit 15 (Palm Beach) be initiated for the 2013/2014 contract year.

Over the past twelve months, Circuit 15 has experienced a 72% increase in the number of cumulative removals in comparison to the prior twelve month period (Chart 1). The initial surge in monthly removals began in January 2013 with an increase of 49% from the preceding month. The elevated levels of removals continued for several months and culminated with an increase of 151% (82) between the months of June 2013 and August 2013 (Chart 2). For the last quarter of 2013, monthly removal numbers remain at an average of 120% (48) above the monthly removals from the last quarter of 2012 (Chart 2).

In connection with the activity above, ChildNet has experienced a 29% increase in the number of children served through in-home services (Chart 3) and a 27% increase in the number of children served through out-of-home services (Chart 4). Direct service expenditures have also increased by more than \$1.2 million in the last six months (Chart 5). As a result, ChildNet has already utilized over 53% of the current funding allocation for Circuit 15, leading to a current deficit of approximately \$1.2 million.

Based on the current removal rate and the utilization levels year to date, ChildNet is projecting a deficit of more than \$2 million by the end of the fiscal year.

If you have any questions or require any additional information, please contact me at ageddes@childnet.us or 954-414-6000.

Sincerely,

Ainsworth Geddes
Chief Financial Officer

CC: Dennis Miles, Regional Managing Director

Dennis Miles
Regional Managing Director Southeast Region
Florida Department of Children and Families
111 South Sapodilla Avenue
West Palm Beach, FL 33401

Dear Mr. Miles:

Over the last two years, ChildNet Palm Beach has experienced unprecedented increases in the rates of removal of children from their homes due to abuse, abandonment, and neglect. The number of children removed increased by approximately 46% over that time period (Figure 1). The average monthly removal rate went from 58 in fiscal year 2012/2013 to 85 in the first eleven months of the current fiscal year (2014/2015). The level of removals over the last two years is the highest experienced in the last six years (Figure 1). At the end of May 2015, ChildNet Palm Beach was serving 1,741 children (Figure 2), a net of 228 more children than at the end of May 2013 and 485 more children than three years ago. This represents an increase of approximately 15% in the number of children served over a two year period and a 39% increase over a three year time frame.

Due to the increase in the removal rates and the elevated levels of children in the Palm Beach child welfare system, ChildNet Palm Beach realized a deficit of \$3.1 million at the end of the 2013/2014 fiscal year. ChildNet received a special allocation of funds in the 2014/2015 fiscal year to help mitigate the impact of increased costs. However, those funds were not sufficient to meet the increased demand.

As a result of the continued escalation of children entering the system, direct service expenditures for the first ten months of the current fiscal year (July 2014 – April 2015) have already exceeded the expenditures from the same time period from the last fiscal year (July 2013 – April 2014) by approximately \$1.6 million. ChildNet's current projected deficit for the end of the fiscal year is more than \$3 million. In addition to the deficit for 2014-15 fiscal year, based on the current trend in removals, ChildNet is also projecting a deficit of approximately \$4.6 million (Figure 3) for the 2015-16 fiscal year. This projected deficit is based on the estimated 2015-16 DCF funding level.

Despite the increased levels of children entering the system, ChildNet continued to provide high levels of service in a fiscally responsible manner. ChildNet Palm Beach maintains one of the lowest administrative cost percentages throughout the

Our Mission:

To protect abused,
abandoned and
neglected children in
the communities
we serve.

State. At the beginning of the current fiscal year, ChildNet's Board of Directors took several steps in an effort to mitigate the projected deficit. The proactive steps included rate-cuts for providers, agency-wide salary decreases, and eliminating approximately 15% of the ChildNet Palm Beach budgeted support positions. There are no additional steps that ChildNet can undertake to address the carry-forward deficit for the 2014/2015 fiscal year or our projected deficit for fiscal year 2015/2016 that would not significantly impact the services provided to the children and potentially endanger lives.

Pursuant to Attachment I, Section 1.4.3 of the DCF contract and F.S. 409.990, ChildNet, Inc. is requesting assistance from the risk pool in addressing the deficit that resulted from the significant influx of children into the child welfare system in Palm Beach.

If you have any questions or require any additional information, please contact me at ebenitez@childnet.us or 954-414-6000 x3000.

Sincerely,

A handwritten signature in black ink, appearing to read "Emilio Benitez", with a stylized flourish at the end.

Emilio Benitez
President/CEO

* Unfunded FY12-13 Core Services Bgt

Casey Foundation (non-state) Grant

Maintenance Adoption Subsidies (MAS)

Independent Living (IL)

Total FY12-13 CBC Appropriations

* Pending AOB Funding Analysis

Notes

- Core funding based on DCF calculation of recurring base (as defined in 409.16713)
- Equity Funding based on Fair Share model
- Year 2 funding based on:

Percentage based on SFY 2011-2012 recurring	75%
Percentage based on Fair Share Model:	25%
- Increase based on Fair Share model for CBCs below equity.

FY12-13 Issue Recap

Issue	Title	Amount
