### SunCoast Region

#### Strategies

The strategy is the implementation of specific child welfare practices, programs or policies that will be used to make improvements. Please note whether the strategy is an evidence-based, promising research program and whether it is part of a title IV-E demonstration waiver project. Strategies may be directed at making improvements under more than one goal. In those circumstances, identify each of goals.

#### Key Activities

Succinctly name and describe the key activities associated with the strategy, including a description of the target population(s) and geographic scope. Include the key activities associated with the strategy. Also, identify where technical assistance from the National Capacity Building Center will be requested.

Key activities are metrics such as a process measure, implementation milestone or benchmark, or interim improvement in outcomes or systemic factors. For each key activity, include the projected completion date. Key activities help determine whether the state is on track to make the required changes for implementation of the improvement.
