

CORE Readiness Assessment

EXTENT OF MALTREATMENT

This question is concerned with the maltreating behavior and immediate effects on a child. It considers what is occurring or has occurred and what the results are (e.g., hitting, injuries, lack of supervision, etc.). The answer to this question also results in a finding/identification of maltreatment (as in an allegation or substantiation of the alleged maltreatment). This question is typically the focus of most hotline reports and investigations. So, it is very important.

However relying only on information from this question is inadequate for assessing safety.

Information that answers this question includes:

- Type of maltreatment;
- Severity of maltreatment;
- Description of specific events;
- Description of emotional and physical symptoms;
- Identification of the child and maltreating caregiver;
- Condition of the child.

NATURE OF THE MALTREATMENT: SURROUNDING CIRCUMSTANCES

This question is concerned with the nature of what accompanies or surrounds the maltreatment. It addresses what is going on at the time that the maltreatment occurs or occurred. It serves to qualify the maltreatment by placing it in a context or situation that 1) precedes or leads up to the maltreatment, or 2) exists while the maltreatment is occurring. By selectively "assessing" this element separate from the actual maltreatment, we achieve greater understanding of how serious the maltreatment is. In other words, circumstances that accompany the maltreatment are important and are significant in themselves and qualify how serious the maltreatment is.

Information that answers this question includes:

- The duration of the maltreatment;
- History of maltreatment;
- Patterns of functioning leading to or explaining the maltreatment;
- Parent/legal guardian or caregiver intent concerning the maltreatment;
- Parent/legal guardian or caregiver explanation for the maltreatment and family conditions;
- Unique aspects of the maltreatment, such as whether weapons were involved;
- Caregiver acknowledgement and attitude about the maltreatment and;
- Other problems occurring in association with the maltreatment.

CHILD FUNCTIONING

This question is concerned with the child's general behavior, emotions, temperament, and physical capacity. It addresses how a child is from day to day, rather than focusing on a point in time (i.e., CPI contact, time of maltreatment event). A developmentally appropriate standard is applied in the area of inquiry. This information element is qualified by the age of the child. Functioning is considered with respect to age appropriateness. Age appropriateness is applied against the "normalcy" standard. So, it is critical that you have a working understanding of child development given that you will be considering how a child is functioning in respect to what is expected given the child's age. Among the areas you will consider in information collecting and "assessing" are trust, sociability, self-awareness and acceptance, verbal skills/communication, independence, assertiveness, motor skills, intellect and mental performance, self-control, emotion, play and work, behavior patterns, mood changes, eating and sleeping habits and sexual behavior. Additionally, you consider the child's physical capabilities including vulnerability and ability to make needs known.

Information that answers this question includes:

- General mood and temperament;
- Intellectual functioning;
- Communication and social skills;
- Expressions of emotions/feelings;
- Behavior;
- Peer relations;
- School performance;
- Independence;
- Motor skills;
- Physical and mental health;
- Functioning within cultural norms.

ADULT FUNCTIONING

This information element has strictly to do with how adults (the caregivers) in a family household are functioning. This question is concerned with how the adults (parents/legal guardians or caregivers) in the family household typically feel, think, and act on a daily basis. The question here focuses on adult functioning separate of parenting. We are concerned with how the adults behave regardless of the fact that they are parents or caregivers. The question is concerned with life management, social relationships, meeting needs, problem solving, perception, rationality, self-control, reality testing, stability, self-awareness, self-esteem, self-acceptance and coherence. Remember it is important that recent (adult related) history is captured here such as employment experiences, criminal history, substance use/abuse history, previous relationships, and violence in relationships.

Information that answers this question includes:

- Communication and social skills;
- Coping and stress management;
- Self-control;
- Problem solving;
- Judgment and decision making;
- Independence;
- Home and financial management;
- Employment;
- Citizenship and community involvement;
- Rationality;
- Self-care and self-preservation;
- Substance use;
- Mental health;
- Family and/or domestic violence;
- Physical health and capacity; and
- Functioning within cultural norms.

GENERAL PARENTING

This question explores the general nature and approach to parenting which forms the basis for understanding caregiver-child interaction in more substantive ways. When considering this information element, it is important to keep distinctively centered on the overall parenting that is occurring and not allow any maltreatment incident or discipline to shade your study. Among the issues for consideration within this element are: parenting styles and the origin of the style, basic care, affection, communication, expectations for children, sensitivity to an individual child, knowledge and expectations related to child development and parenting, reasons for having children, viewpoint toward children, examples of parenting behavior and parenting experiences.

Information that answers this question includes;

- Reasons for being a caregiver;
- Satisfaction in being a caregiver;
- Parent/legal guardian or caregiver knowledge and skill in parenting and child development;
- Parent/legal guardian or caregiver expectations and empathy for a child;
- Decision making in parenting practices;
- Parenting style;
- History of parenting behavior;
- Cultural practices; and
- Protectiveness.
