TERMS AND DEFINITIONS

Terms	Description

SCOPE

INITIAL REQUEST & ASSUMPTIONS

Business Statement

DCF requests an update to the job processor to increase the performance when running jobs.

Scope Definition

FEI will convert FASAMS to AWS Serverless for job processing. The serverless job processor uses Lambda functions, and more Lambda functions can be dynamically added when more processing power is needed based on submission load.

Note: An EC2 server will need to be retained specifically to support task services.

Assumptions, Constraints, Dependencies

- This enhancement applies only to FASAMS Version 14.

- Note, this is part 3 of a three part enhancement.

EXISTING FUNCTIONALITY

Currently, the job processor operates on EC2 servers.

PROPOSED FUNCTIONALITY

FEI will convert FASAMS to AWS Serverless for job processing. The serverless job processor uses Lambda functions, and more Lambda functions can be dynamically added when more processing power is needed based on submission load.

Note: An EC2 server will need to be retained specifically to support task services.

INITIAL ESTIMATE/ QUOTE HISTORY

Phase/ Quote Date	TFS Item #(s)	Description	Estimate/ Quote
1/24/2022	546000	Initial Estimate	Extra Large (Note: IE was made when this work item was combined with enhancement 568459)
10/13/2022	546000	Final Estimate	Final Estimate: Analysis – 25 Dev – 25 Test – 175 Acct / Project Management – 0 Total – 225

REQUIREMENTS

NOTES TO DEVELOPER

1. CONVERT FASAMS TO AWS SERVERLESS

Req. ID	Requirement	Ref. ID	Dev	QA
1.0	Assign FASAMS URLs to AWS Lambda functions <ul style="list-style-type: none"> Including environments for Train, UAT, and PRD <ul style="list-style-type: none"> Note: URLs will transition to AWS Serverless in the natural deployment process for all environments 		<input type="checkbox"/>	<input type="checkbox"/>
1.1	Update Daily Report to operate as expected within the new environment architecture <ul style="list-style-type: none"> Note: Changes to Daily Report can occur as part of this requirement <ul style="list-style-type: none"> See ReqID 3.0 for specifics on the requested changes to Daily Report 		<input type="checkbox"/>	<input type="checkbox"/>
1.2	Update all Performance Reports that rely on Staging Tables		<input type="checkbox"/>	<input type="checkbox"/>
1.3	Update FASAMS architecture documentation to show AWS Serverless as the primary processor in place of current EC2 servers		<input type="checkbox"/>	<input type="checkbox"/>

2. DATABASE MIGRATION

Req. ID	Requirement	Ref. ID	Dev	QA
2.0	Database migration to move all data to AWS Serverless databases <ul style="list-style-type: none"> Back up and restore database after AWS serverless environments are stood up 		<input type="checkbox"/>	<input type="checkbox"/>

3. UPDATE DAILY REPORT

Req. ID	Requirement	Ref. ID	Dev	QA
3.0	Update the Daily Report per client requests, as referenced in Req ID 1.1 <ul style="list-style-type: none"> Changes to Daily Report: <ul style="list-style-type: none"> Add schedule to 'Batch Jobs' tab Remove 'N/A' as an option in the column 'Number of Records Processed' on the 'Batch Jobs' tab. Replace with '0'. <ul style="list-style-type: none"> This field should always be an integer 		<input type="checkbox"/>	<input type="checkbox"/>
3.1	Add Schedule to batch jobs tabs: <ul style="list-style-type: none"> Add new column called 'Schedule' For each row add the following text under the schedule column: <ul style="list-style-type: none"> IDS_Contract <ul style="list-style-type: none"> Schedule: 'Daily at 6pm EST' MasterClientindex_MCI <ul style="list-style-type: none"> Schedule: Daily at 6 pm EST MedicaidManagement_Encounter <ul style="list-style-type: none"> Schedule: Runs Daily. Trigger files for new clients sent on the first calendar day of each month. Trigger files for recurring clients on the 2nd weekday of each week (i.e. Tuesday). Response files are processed each time the service runs, but are only expected to exist after either new or recurring client trigger files are generated as described above. MedicaidManagement_EnrollmentandEligibility <ul style="list-style-type: none"> Schedule: Daily at 3am EST. Each client is checked once per month. ProviderLicensingAHCA <ul style="list-style-type: none"> Daily at 1am EST ProviderLicensreDesignationSystem_PLADS <ul style="list-style-type: none"> Daily at 1am EST TedsExtract <ul style="list-style-type: none"> Monthly on the 21st of every month 			

Example: Screenshot of Daily Batch Report

FASAMS Daily Batch Report					
Batch Process	Last Run	Status	Number of Records Processed	Timeframe	Schedule
IDS_Contract	2/9/2023 11:00:00 PM	Success	14	Daily	Daily at 6pm EST
MasterClientIndex_MCI	2/9/2023 3:30:00 AM	Success	N/A	Daily	Daily at 6pm EST
MasterClientIndex_MCI_Version14	10/21/2022 3:30:08 AM	Success	662344	Daily	To be removed
MedicaidManagement_Encounter	2/10/2023 4:00:04 AM	Success	0	Daily	Runs Daily. Trigger files for new clients sent on the first calendar day of each month. Trigger files for recurring clients on the 2nd weekday of each week (i.e. Tuesday). Response files are processed each time the service runs, but are only expected to exist after either new or recurring client trigger files are generated as described above.
MedicaidManagement_EnrollmentAndEligibility	2/10/2023 3:00:05 AM	Success	37549	Daily	Daily at 3am EST. Each client is checked once per month.
ProviderLicensingAHCA	2/10/2023 7:59:59 AM	Success	2130	Daily	Daily at 1am EST
ProviderLicensureDesignationsSystem_PLADS	2/10/2023 5:00:00 AM	Success	1436	Daily	Daily at 1am EST
TedsExtract	1/23/2023 10:30:01 PM	Success	138960	Monthly	Monthly on the 21st of every month

4. ADD SKIP LOGIC FOR DUPLICATE DATA SET RECORDS

Req. ID	Requirement	Ref. ID	Dev	QA
4.0	Add CheckSum logic to Job Processor to: <ul style="list-style-type: none"> Skip an entire data set record if the submitted record values are exactly what is currently stored in the database <ul style="list-style-type: none"> Definition of a data set record: An entire data set record includes all fields within a data set under the root entity, including all subentities of the root entity Example: The skip logic would be triggered for a TreatmentEpisode record if the 'ProviderTreatmentEpisode' entity values and ALL values in ALL subentities are unchanged from the values stored in the database Note: The skip logic will not be applied to any specific subentity within the data set <ul style="list-style-type: none"> This is to avoid job processing performance issues that would be caused by executing copious CheckSums 		<input type="checkbox"/>	<input type="checkbox"/>

5. CREATE NEW LAMBDA TO POPULATE SECURITY REPORT TABLE

Req. ID	Requirement	Ref. ID	Dev	QA
5.0	<ul style="list-style-type: none"> Update CDK Package to create Lambda to populate Security Table 		<input type="checkbox"/>	<input type="checkbox"/>

6. UPDATE FASAMS REPORTS TO USE SSRS REPORT ARCHITECTURE

Req. ID	Requirement	Ref. ID	Dev	QA
6.0	<ul style="list-style-type: none"> Update View SSRS URL endpoint 		<input type="checkbox"/>	<input type="checkbox"/>

7. CREATE FASAMS SERVERLESS UAT AND PRODUCTION ENVIRONMENTS

Req. ID	Requirement	Ref. ID	Dev	QA
7.0	<ul style="list-style-type: none"> Create new UAT and Production Environments for AWS Serverless 		<input type="checkbox"/>	<input type="checkbox"/>

8. UPDATE SSMS SYNCHRONIZATION PROCESS TO WORK WITH COGNITO

Req. ID	Requirement	Ref. ID	Dev	QA
8.0	<ul style="list-style-type: none"> Synchronize SSMS (SQL Server Management Studio) to process using Cognito 		<input type="checkbox"/>	<input type="checkbox"/>

TESTING REQUIREMENTS (FOR TESTING PURPOSES, QA CAN USE SERVER BASED FASAMS TEST SITE FOR DIRECT COMPARISON OF JOB PROCESSING, UI, ETC; AS NEEDED)

9. CONVERT FASAMS TO AWS SERVERLESS (JOB PROCESSING)

Req. ID	Requirement	Ref. ID	Dev	QA
9.0	<ul style="list-style-type: none"> Verify Submission of all Data Sets submit successfully thru UI and display correctly in database. Verify submitted job displays on job detail screen and in corresponding table in database <ul style="list-style-type: none"> Provider Client Acute Care Treatment Episode Service Event Subcontract Waiting List Contract 		<input type="checkbox"/>	<input type="checkbox"/>
9.1	Verify 'Export Jobs' Button correctly exports jobs in Excel <ul style="list-style-type: none"> Download button export job to Excel file 			
9.2	Verify 'Search' field correctly search for value in search field			
9.3	Verify 'Refresh' button refreshes screen correctly			
9.4	Verify 'Submit a Support Ticket' button functions correctly			
9.5	Verify user can logout via 'Logout' button			
9.6	Verify Vertical Ellipsis menu displays <ul style="list-style-type: none"> Change Password User Profile – 'My Profile' 			
9.7	Verify 'Advance Filtering' menu displays <ul style="list-style-type: none"> Submitter User Start Date End Date DataSets Status Successful 			
9.8	Verify filter arrow displays next to: <ul style="list-style-type: none"> Name Submitter User Date Status Successful Errors Warnings 			

10. UPDATE REPORTS MODULE

Req. ID	Requirement	Ref. ID	Dev	QA
10.0	Verify Reports Module displays and generates report		<input type="checkbox"/>	<input type="checkbox"/>
10.1	Verify Report Module screen displays: <ul style="list-style-type: none"> • Client Report <ul style="list-style-type: none"> ▪ Client Search ▪ Client UCIs 			
10.2	Verify 'Exception <ul style="list-style-type: none"> • Exception Category dropdown is removed <ul style="list-style-type: none"> ○ Verify 'Clients missing UCIs with Services'no longer displays <ul style="list-style-type: none"> ▪ Remove Category: Exception <ul style="list-style-type: none"> • Remove Permission 			
10.3	Verify Job Submission Performance menu displays correctly <ul style="list-style-type: none"> • Job Submission Performance <ul style="list-style-type: none"> ○ Overall Job Performance ○ Submission Summary ○ Submission Rollup ○ FASAMS Submission Performance Report ○ Failed Records Report <ul style="list-style-type: none"> ▪ Failed Records ▪ Failed Records – Treatment Episode ▪ Failed Records – Service Event ○ Placement Record Exception ○ Security Report <ul style="list-style-type: none"> ▪ User Account Security 			

11. UPDATE TASK SCHEDULER USING EVENT BRIDGE

Req. ID	Requirement	Ref. ID	Dev	QA
11.0	<ul style="list-style-type: none"> • Verify Task Scheduler runs daily <ul style="list-style-type: none"> ○ Enable task in lower environment <ul style="list-style-type: none"> ▪ Verify task trigger files show a record in the task scheduler synchronization table (TaskSchedulerModule.SynchronizationServiceTaskStatus) ▪ Coordinate with DEV team for testing ○ Verify Interfaces for AHCA and PLADS are enabled and running as expected ○ Verify the following task run as expected: <ul style="list-style-type: none"> ▪ IDS_Contract ▪ MasterClientIndex_MCI ▪ MedicaidManagement_Encounter ▪ MedicaidManagement_EnrollmentAndEligibility ▪ ProviderLicensingAHCA ▪ ProviderLicensureDesignationsSystem_PLADS ▪ TedsExtract 		<input type="checkbox"/>	<input type="checkbox"/>

12. TEDS EXTRACT

Req. ID	Requirement	Ref. ID	Dev	QA
12.0	<ul style="list-style-type: none"> • Verify TEDS Extract is generated and displays in database <ul style="list-style-type: none"> ○ Verify Teds Extract run monthly as expected 		<input type="checkbox"/>	<input type="checkbox"/>

13. ADMINISTRATION

Req. ID	Requirement	Ref. ID	Dev	QA
13.0	Verify Administration menu displays with tabs: <ul style="list-style-type: none"> • Submitting Entities • Users • Message • Roles • Groups • Support Ticket 		<input type="checkbox"/>	<input type="checkbox"/>
13.1	Submitting Entities Tab <ul style="list-style-type: none"> • Verify Submitting Entities list displays assigned to user • Verify '+New Submitting Entity' button displays • Verify 'Search' Field displays • Verify filter option displays next to 'Name' and Allowed Data Sets • Verify page scroll displays at bottom of screen • Verify vertical ellipsis displays next to each submitting entity with drop down menu <ul style="list-style-type: none"> ○ View Details ○ Delete 			
13.2	Verify under Submitting Entities tab, then View Details, Submitting Entity Workspace displays: <ul style="list-style-type: none"> • Profile • Contacts • Allow Data Sets <ul style="list-style-type: none"> ○ Note: Data Entry Screen Read Only boxes should not display 			
13.3	Users Tab <ul style="list-style-type: none"> • Verify new user can be created and displays in the database under 'Administration' <ul style="list-style-type: none"> ○ Verify 'Add User' screen displays • Verify existing users display in UI and in database under Administration <ul style="list-style-type: none"> ○ Verify existing users profile can be accessed via vertical ellipsis <ul style="list-style-type: none"> ▪ Verify menu displays <ul style="list-style-type: none"> • View Details • Reset password • Lock Account • Disable Account • Verify page scroll displays at bottom of screen 			
13.4	Verify User Workspace display upon 'View Details' option <ul style="list-style-type: none"> • Profile • Groups • Account <ul style="list-style-type: none"> ○ Manage Roles <ul style="list-style-type: none"> ▪ Verify Available Roles and Assigned Roles sections display • Roles • Manage Roles • Account Information • Login Information • Notifications 			
13.5	Message Tab <ul style="list-style-type: none"> • Verify Message section displays and can create a new message for all message types • Verify 'Edit Notification' option displays 			

Req. ID	Requirement	Ref. ID	Dev	QA
	<ul style="list-style-type: none"> Verify Disclaimer section displays 			
13.6	Roles Tab <ul style="list-style-type: none"> Verify Roles section displays Verify '+New Role' option displays Verify 'Search' field displays Verify 'Name' and 'Type' columns displays Verify filter option displays next to 'Name' and 'Type' Verify page scroll displays at bottom of page 			
13.7	Verify vertical ellipsis displays menu: <ul style="list-style-type: none"> View details Delete 			
13.8	Under 'View Details' menu, verify the following displays: <ul style="list-style-type: none"> Profile Permissions <ul style="list-style-type: none"> Manage Permissions <ul style="list-style-type: none"> Verify Available Permission and Assigned Permission sections display 			

14. CREATE SOLUTION TO ALLOW CONFIGURATION OF VALIDATION RULE IN UI

Req. ID	Requirement	Ref. ID	Dev	QA
14.0	Verify Configuration screen and tabs display: <ul style="list-style-type: none"> Vocabulary Versions Rules Dynamic Data Sets 		<input type="checkbox"/>	<input type="checkbox"/>
14.1	Vocabulary Versions Tab Verify existing and newly created vocabulary display in UI and in database <ul style="list-style-type: none"> User has ability to add new vocabulary; file submission submits successfully based on new vocabulary Verify managing entities can successfully map their vocabulary User can successfully export vocabulary; both Complete and Simple 			
14.2	Rules Tab <ul style="list-style-type: none"> Verify all DataSets display Verify 'Edit Date Thresholds' button displays Verify 'Search' Field displays Verify Vertical Ellipsis displays for each DataSet <ul style="list-style-type: none"> Verify Drop down menu displays <ul style="list-style-type: none"> View Details Export Rules, Errors and Warning 			
14.3	View Details under each Data Set should display all sub entities under that DataSet <ul style="list-style-type: none"> Each sub entities tab should display with <ul style="list-style-type: none"> Name DataSet Comparison Date Effective Date Expiration Date Enabled Edit Option 			
14.4	Edit Option should open to Business Rule Workspace: <ul style="list-style-type: none"> Profile 			

Req. ID	Requirement	Ref. ID	Dev	QA
	<ul style="list-style-type: none"> • Parameters <ul style="list-style-type: none"> ○ Data Set ○ Comparison Date ○ Effective Date ○ Expiration Date 			

15. OPERATIONAL DATA STORE (ODS) DB

Req. ID	Requirement	Ref. ID	Dev	QA
15.0	Verify all data tables and folders displays in the AWS Environment <ul style="list-style-type: none"> • All DataSet Tables • MedicaidModule Tables • SecurityModules Tables • StagingModule Tables • SubmissionModule Tables • TaskSchedulerModule Tables • VocabularyModule Tables • X12Module <ul style="list-style-type: none"> ○ Hipaa270 ○ Hipaa271 		<input type="checkbox"/>	<input type="checkbox"/>
15.1	Verify all 'View' tables display <ul style="list-style-type: none"> • System Views 			
15.2	Verify all 'Security' tables display <ul style="list-style-type: none"> • Users • Roles 			

16. UPDATE TO USE INTEGRATED FASAMS VOCABULARY

Req. ID	Requirement	Ref. ID	Dev	QA
16.0	Verify existing and newly created vocabulary display in UI and in database <ul style="list-style-type: none"> • User has ability to add new vocabulary; file submission submits successfully based on new vocabulary • Verify managing entities can successfully map their vocabulary • User can successfully export vocabulary; both Complete and Simple 		<input type="checkbox"/>	<input type="checkbox"/>

17. SKIP LOGIC

Req. ID	Requirement	Ref. ID	Dev	QA
17.0	<ul style="list-style-type: none"> • Verify job submissions process faster due to bypassing validation process <ul style="list-style-type: none"> ○ Submit files with and without changes to the entire root entity <ul style="list-style-type: none"> ▪ Note: Verify that Record Version column does not increment up when root entity is submitted with no changes 		<input type="checkbox"/>	<input type="checkbox"/>

18. CONFIRM EXISTING FASAMS URL LAUNCH AFTER UPDATE

Req. ID	Requirement	Ref. ID	Dev	QA
18.0	<ul style="list-style-type: none"> • Confirm existing Environments still launch after update 		<input type="checkbox"/>	<input type="checkbox"/>

19. UPDATE FASAMS SUBMISSION TAB

Req. ID	Requirement	Ref. ID	Dev	QA
19.0	Add a new column to the Submission tab named "ROOT SUCCESSFUL" <ul style="list-style-type: none"> column will show count of all successfully processed Root entities see column location below 		<input type="checkbox"/>	<input type="checkbox"/>
19.1	Update "SUCCESSFUL" column name to be "TOTAL SUCCESSFUL" <ul style="list-style-type: none"> the query that populates this column will not change see column location below 			

20. UPDATE FASAMS ARCHITECTURE DOCUMENTATION

Req. ID	Requirement	Ref. ID	Dev	QA
20.0	<ul style="list-style-type: none"> Update FASAMS architecture documentation to show AWS Serverless as the primary processor in place of current EC2 Servers 		<input type="checkbox"/>	<input type="checkbox"/>

ARE PAMPHLET UPDATE REQUIRED? YES NO

Update ID	Pamphlet Chapter/Sections requiring change	Completed by FEI	Approved by DCF
