

# Summary of Enhancements 2024.10.2 (10.2.0) (Q2 2023-2024)

{released to UAT 3/29/2024, released to PRD 4/4/2024}

## Finalized Enhancements

### 1. **Correct Behavior of Existing MCI Interface**

DCF is requesting that the current Master Client Index (MCI) interface be modified to prevent SSNs in the Client table from being updated to all zeroes. DCF further requests that any existing values currently in the FASAMS database in the ClientModule.Client table be reverted back to its original submitted value stored in the ProviderClient.Identifier table.

- FEI will update MCI Interface to prevent SSNs in the Client table from being updated to all zeroes. All SSN values that are equal to all zeroes in the Client table will be updated to their originally submitted value stored in the ProviderClient.Identifier table.
