II.   Scope

This chapter provides general guidelines for ensuring the privacy and security of Protected Health Information (PHI) maintained in the Substance Abuse and Mental Health Data Information System (SAMHIS). The purpose of this chapter is twofold:

- To highlight the basic privacy and security safeguards that must be followed by authorized persons when performing a function that involves the use or disclosure of Protected Health Information in the SAMH system; and
- To describe the procedures for requesting and obtaining access to the SAMHIS system, including the policy directive for compliance with security awareness training requirements.

A copy of this chapter and appropriate form can be found on the Department web site at the following URL:

http://www.myflfamilies.com/service-programs/substance-abuse/pamphlet-155-2-v11

Pamphlet 155-2 chapters are listed and accessed individually.

III.   Protected Health Information (PHI)

The SAMHIS system contains some of the 18 data elements contained in Title 45, Code of Federal Regulations (CFR), Parts 160 and 164, which is the Final Rule of the Health Insurance Portability and Accountability Act (HIPAA) establishing the national standards to protect individuals' medical records and other personal health information, including the privacy of individually identifiable health information. As such, only authorized persons, who must protect this individually identifiable information from accidental or intentional misuse, can access it.

The use or disclosure of any individually identifiable information in the SAMH system must be in accordance with all federal and state laws and regulations, including guidelines and standards to guard data integrity, confidentiality, availability, and reliability. Those that apply directly or indirectly to the security and privacy of data in the SAMH system include, but are not limited to, the following:

- Title 45 Code of Federal Regulations (CFR), Parts 160 and 164: Standards for Privacy of Individually Identifiable Health Information – Final Rule of the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
- Title 42 Code of Federal Regulations (CFR), Part 2: Confidentiality of Alcohol and Drug Abuse Patient Records.
- Section 394.4615, Florida Statutes: Confidentiality of Mental Health Clinical Records.
- Section 397.501(7), Florida Statutes: Right to Confidentiality of Substance Abuse Client Records.
- Section 916.107(8), Florida Statutes: Confidentiality of Clinical Records for Mentally Deficient and Mentally Ill Defendants.
- Title 45 Code of Federal Regulations (CFRR), Part 142: Security and Electronic Signature Standards – Final Rule of the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
- Section 282.318, Florida Statutes: Security of Data and Information Technology.
- Department of Children and Families Operating Procedure (CFOP 50-2): Security of Data and Information Technology Resources.

IV.   Basic Security Safeguards

Below are the minimum-security measures to protect data in the SAMH system from accidental or intentional unauthorized disclosure, modification, or destruction by persons within or outside of the department.

1. Individual User Account: Each SAMH user must have a unique user account. This account should consist of the following information:

  a. A personal identifier (i.e., User Logon ID) that is assigned and controlled by the DCF Security Officer in Tallahassee. To obtain this confidential User Logon ID, a user must complete, sign and submit the following four (4) documents to the appropriate Regional/Managing Entity Data Liaison or DCF Security Officer as outlined in IV.2:

    i. The Database Access Request Form,
    ii. The DCF Security Agreement Form (CF114),
    iii. The online Security Awareness Training Certificate, and
    iv. The online Health Insurance Portability and Accountability Act (HIPAA) Training Certificate.

    Note: User requests for new or continued database access are scanned and maintained electronically by the SAMHIS Security Officer in Tallahassee.

  b. A private password. The DCF Security Officer in Tallahassee will also assign a default password to each authorized SAMH user. The user will be prompted to change the default password immediately after logging into the system for the first time and regularly, thereafter, as required by the department.

2. The online Security Awareness Training and the HIPAA Training **must** be updated annually. In addition, all employees of the private and public agencies, who have access to departmental information shall comply with, and be provided a copy of CFOP 50-2, and shall sign the DCF Security Agreement form CF114 annually. Copies of the certificates and signed Security Agreement forms (CF114) should be kept in the Human Resources file of each employee. Managing Entities are responsible, by contract, for ensuring that all their appropriate staff members and staff members of their sub-contractors complete Form CF114 and take the updated trainings annually.

3. SAMH system users are prohibited from sharing their passwords and User Logon IDs with other individuals. They are also prohibited from sharing or discussing client-identifying information (PHI) with anyone unless the other person is also an authorized SAMH user or the agency has designated the person as having a need to know in accordance with agency operating procedures.

4. Any computer, which contains or has access to SAMH data or other individually identifiable information**, must** be password protected and should be located in a lockable room. The computer should be programmed to time out or to turn off automatically after 15 minutes or less without activity, and the room **must** be locked when the SAMH system user is not physically in the room.

5. Screensavers must be used and be password protected.

6. Any file containing confidential information that is not stored in a secure computer must be kept in a secure location whose accessibility requires the use of lock and key.

7. SAMH data or other individually identifiable information should never be sent to a fax machine number or to a printer unless a user is absolutely sure that the recipient equipment is located in a secure location accessible only to authorized users.

8. When sending client information by e-mail, it must be encrypted and password protected. A minimum of 128-byte encryption is required when using this process. Never send data being submitted in the body of the message. Passwords should be encrypted and sent in a separate email.

9. SAMH users at all levels (state, circuit/region and provider) should use preventive measures to minimize the risk of destruction, theft or loss of equipment and software, and to protect SAMH data from unauthorized disclosure, misuse, modification or destruction.

10. Supervisors and security SAMH Administrators at all levels (state, circuit/region and provider) are responsible for ensuring that SAMH users are trained and that appropriate access is allowed.

11. Security Parameters

Fail Logon Limit: 3 times
Password Expiration Days: 45 days
Password Minimum Length: 6 digits (numbers and/or letters)
Password Maximum Length: 8 digits (numbers and/or letters)
Previous Password Number: 15 (cannot use last 15 passwords)
Password Lock: 45 days of inactivity
Account Deactivation: 60 days of inactivity

12. An agency must: (1) immediately notify the Regional/Managing Entity Data Liaison or HQ SAMH Security Officer if a user has separated from the agency or no longer needs SAMHIS access in their current job duties, and (2) submit a completed Database Access Request Form with the Deactivate User box checked. This will allow the HQ Security Officer to deactivate the user accounts. Otherwise, the system will automatically lock their passwords or deactivate their accounts as specified in the item below pertaining to "User Password Lock for Inactivity and Revocation of User Account."

V.   Procedures for Requesting and Obtaining Access to SAMH and IRAS Systems

1. Any person requesting access to the SAMH system must complete, sign and submit the four (4) specific documents listed above in item IV.1.a. Copies of the forms are available online at http://www.myflfamilies.com/service-programs/substance-abuse/SAMHIS/data-forms. Online Security Awareness and HIPAA training is available at: http://www.myflfamilies.com/general-information/dcf-training.

VI. Procedures for User Password Lock for Inactivity and Revocation of User Account

For users who do not routinely access SAMHIS, i.e., do not log into the system to perform any activity, their passwords will be locked out <u>automatically</u> by the system and their accounts will be deactivated as follows:

1. After 45 consecutive days of inactivity, the password will be locked out. Users whose passwords are locked out of the system in this manner or who forgot their passwords can have their passwords reset by contacting the Help Desk or their Regional/Managing Entity Data Liaison, or SAMH Security Officer for assistance.

2. After 60 consecutive days of inactivity, the user account will be revoked. The system provides User Lockout reports for password lockout and user account revocation, which will be accessible to supervisors and security SAMH Administrators at all levels (state, circuit/region and Managing Entity) for their review. Each quarter, within 15 days following the end of the quarter, the SAMH Security Officer will review the User Lockout report for users locked out due to 60 days inactivity.

    a.   The SAMH Security Officer will email non-contracted users notifying them of their lockout and impending revocation. To avoid revocation, documentation outlined in IV.1.a. must be submitted to the appropriate Regional Data Liaison or SAMH Security Officer (see V.2.) within 5 days.

    b.   The SAMH Security Officer will email designated managing entity contacts a list of all agency and subprovider users locked out with impending revocation. To avoid revocation, documentation outlined in IV.1.a. must be submitted to the appropriate Regional/Managing Entity Data Liaison or SAMH Security Officer (See V.2.) within 5 days.

    c.   All correspondence from the SAMHIS Security Officer regarding user accounts for which a response is not received within 5 days will result in revocation of the user account.

X. CHAPTER 815: COMPUTER-RELATED CRIMES

815.01 Short title. The provisions of this act shall be known and may be cited as the "Florida Computer Crimes Act." (History: s. 1, ch. 78-92.)

815.02 Legislative intent. The Legislature finds and declares that:

(1) Computer-related crime is a growing problem in government as well as in the private sector.

(2) Computer-related crime occurs at great cost to the public since losses for each incident of computer crime tend to be far greater than the losses associated with each incident of other white collar crime.

(3) The opportunities for computer-related crimes in financial institutions, government programs, government records, and other business enterprises through the introduction of fraudulent records into a computer system, the unauthorized use of computer facilities, the alteration or destruction of computerized information or files, and the stealing of financial instruments, data, and other assets are great.

(4) While various forms of computer crime might possibly be the subject of criminal charges based on other provisions of law, it is appropriate and desirable that a supplemental and additional statute be provided which proscribes various forms of computer abuse.

(History: s. 1, ch. 78-92.)

815.03 Definitions. As used in this chapter, unless the context clearly indicates otherwise:

(1) "Access" means to approach, instruct, communicate with, store data in, retrieve data from, or otherwise make use of any resources of a computer, computer system, or computer network.

(2) "Computer" means an internally programmed, automatic device that performs data processing.

(3) "Computer contaminant" means any set of computer instructions designed to modify, damage, destroy, record, or transmit information within a computer, computer system, or computer network without the intent or permission of the owner of the information. The term includes, but is not limited to, a group of computer instructions commonly called viruses or worms which are self-replicating or self-propagating and which are designed to contaminant other computer programs or computer data; consume computer resources; modify, destroy, record, or transmit data; or in some other fashion usurp the normal operation of the computer, computer system, or computer network.

(4) "Computer network" means any system that provides communications between one or more computer systems and its input or output devices, including, but not limited to, display terminals and printers that are connected by telecommunication facilities.

(5) "Computer program or computer software" means a set of instructions or statements and related data which, when executed in actual or modified form, cause a computer, computer system, or computer network to perform specified functions.

(6) "Computer services" include, but are not limited to, computer time; data processing or storage functions; or other uses of a computer, computer system, or computer network.

(7) "Computer system" means a device or collection of devices, including support devices, one or more of which contain computer programs, electronic instructions, or input data and output data, and which perform functions, including, but not limited to, logic, arithmetic, data storage, retrieval, communication, or control. The term does not include calculators that are

not programmable and that are not capable of being used in conjunction with external files.

(8) "Data" means a representation of information, knowledge, facts, concepts, computer software, computer programs, or instructions. Data may be in any form, in storage media or stored in the memory of the computer, or in transit or presented on a display device.

(9) "Financial instrument" means any check, draft, money order, certificate of deposit, letter of credit, bill of exchange, credit card, or marketable security.

(10) "Intellectual property" means data, including programs.

(11) "Property" means anything of value as defined in [Footnote 1] s. 812.011 and includes, but is not limited to, financial instruments, information, including electronically produced data and computer software and programs in either machine-readable or human-readable form, and any other tangible or intangible item of value.

(History: s. 1, ch. 78-92; s. 9, ch. 2001-54.) ([Footnote 1] Note: Repealed by s. 16, ch. 77-342.)

815.04 Offenses against intellectual property; public records exemption.

(1) Whoever willfully, knowingly, and without authorization modifies data, programs, or supporting documentation residing or existing internal or external to a computer, computer system, or computer network commits an offense against intellectual property.

(2) Whoever willfully, knowingly, and without authorization destroys data, programs, or supporting documentation residing or existing internal or external to a computer, computer system, or computer network commits an offense against intellectual property.

(3) (a) Data, programs, or supporting documentation which is a trade secret as defined in s. 812.081 which resides or exists internal or external to a computer, computer system, or computer network which is held by an agency as defined in chapter 119 is confidential and exempt from the provisions of s. 119.07(1) and s. 24(a), Art. I of the State Constitution. (b) Whoever willfully, knowingly, and without authorization discloses or takes data, programs, or supporting documentation which is a trade secret as defined in s. 812.081 or is confidential as provided by law residing or existing internal or external to a computer, computer system, or computer network commits an offense against intellectual property.

(4) (a) Except as otherwise provided in this subsection, an offense against intellectual property is a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. (b) If the offense is committed for the purpose of devising or executing any scheme or artifice to defraud or to obtain any property, then the offender is guilty of a felony of the second degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. History: s. 1, ch. 78-92; s. 1, ch. 94-100; s. 431, ch. 96-406.)

815.045 Trade secret information. The Legislature finds that it is a public necessity that trade secret information as defined in s. 812.081, and as provided for in s. 815.04(3), be expressly made confidential and exempt from the public records law because it is a felony to disclose such records. Due to the legal uncertainty as to whether a public employee would be protected from a felony conviction if otherwise complying with chapter 119, and with s. 24(a), Art. I of the State Constitution, it is imperative that a public records exemption be created. The Legislature in making disclosure of trade secrets a crime has clearly established the importance attached to trade secret protection. Disclosing trade secrets in an agency's possession would negatively impact the business interests of those providing an agency such trade secrets by damaging them in the marketplace, and those entities and individuals disclosing such trade secrets would hesitate to cooperate with that agency, which would impair the effective and efficient administration of governmental functions. Thus, the public and private harm in disclosing trade secrets significantly outweighs any public benefit derived from disclosure, and the public's ability to scrutinize and monitor agency action is not

diminished by nondisclosure of trade secrets. (History: s. 2, ch. 94-100.) (Note. Former s. 119.165)

815.06 Offenses against computer users.

(1) Whoever willfully, knowingly, and without authorization: (a) Accesses or causes to be accessed any computer, computer system, or computer network; (b) Disrupts or denies or causes the denial of computer system services to an authorized user of such computer system services, which, in whole or part, is owned by, under contract to, or operated for, on behalf of, or in conjunction with another; (c) Destroys, takes, injures, or damages equipment or supplies used or intended to be used in a computer, computer system, or computer network; (d) Destroys, injures, or damages any computer, computer system, or computer network; or (e) Introduces any computer contaminant into any computer, computer system, or computer network, commits an offense against computer users.

(2) (a) Except as provided in paragraphs (b) and (c), whoever violates subsection (1) commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. (b) Whoever violates subsection (1) and: 1. Damages a computer, computer equipment, computer supplies, a computer system, or a computer network, and the monetary damage or loss incurred as a result of the violation is $5,000 or greater; 2. Commits the offense for the purpose of devising or executing any scheme or artifice to defraud or obtain property; or 3. Interrupts or impairs a governmental operation or public communication, transportation, or supply of water, gas, or other public service, commits a felony of the second degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. (c) Whoever violates subsection (1) and the violation endangers human life commits a felony of the first degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(3) Whoever willingly, knowingly, and without authorization modifies equipment or supplies used or intended to be used in a computer, computer system, or computer network commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.
