II. General Policies and Considerations

II.A. Adding Client-Specific Service Event Records

1. Contractors should submit a client-specific service event record for each service a client receives.
2. An admission record must exist with the same SSN, CONTRACTORID and PROVIDERID except for the submission of non-client specific event (EVNT) records.

II.B. Updating Client-Specific Service Event Records

1. A client-specific record can be updated by submitting a record with the same mandatory key fields. Refer to the mandatory key fields in Table 3 to identify the record to update. If the key fields match the record will be updated, otherwise, it will be added.

II.C. Deleting Client-Specific Service Event Records

To delete a client-specific service event record, a SERV deletion file must be submitted according to the file layout in Table 2.
