TERMS AND DEFINITIONS

Terms	Description

SCOPE

INITIAL REQUEST & ASSUMPTIONS

Business Statement

DCF requests that submitting entities be permitted to submit any two-character value in the HCPCS modifier field even if they do not exist in Appendix 1 or the FASAMS vocabulary.

Scope Definition

FEI convert ServiceEventHcpcsProcedureModifier.ModifierCode from vocabulary to string field type. FEI will update the system so that display name for known HCPCS modifiers will populate in the table.

FEI will also fully remove business rule "Must Be Valid Modifier For Hcpc Rule" from FASAMS.

Assumptions, Constraints, Dependencies

- This will only apply to FASAMS version 14.

- Because we are updating the field from a vocabulary field to string field, the vocabulary prefix will not be added to the modifier submitted

EXISTING FUNCTIONALITY

Currently, end users can only submit HCPCS modifiers from a defined vocabulary value set. FASAMS supports the ability to toggle on/off the business rule titled “Must Be Valid Modifier For Hcpc Rule.”

PROPOSED FUNCTIONALITY

FEI will convert the ServiceEventHcpcsProcedureModifier.ModifierCode field from vocabulary to string type, then migrate previously submitted ServiceEventHcpcsProcedureModifier.ModifierCodes in the database.

FEI will also fully remove business rule “Must Be Valid Modifier For Hcpc Rule” from FASAMS.

INITIAL ESTIMATE/ QUOTE HISTORY
